

Surfdome - Front end developer test

This test has been produced to help us gain some extra information about your approach to front end development. Its simple and shouldn't take much longer than an hour or two.

Please complete the test and return a link to a github repository containing your work.

The marketing team here at surfdome would like a new homepage layout. They have provided a design (as shown in the image above). We would like you to produce the HTML

and CSS that represents the mockup shown. There are no restrictions on frameworks or technologies you would like to use.

Don't worry too much about colours, fonts, exact margins and padding. We're after a general approach.

Good luck, we look forward to seeing your code!

Surfdome Tech Team
